## Welcome

The Village of Libertyville and the Libertyville Township Road District welcome you to this public meeting for the Phase I Study for Rockland Road Bridge over Des Plaines River Bridge Reconstruction. This meeting is an open house format. We invite you to inspect the exhibits on display, talk with study team members, and provide your verbal and written input.

- ### Purposes of Meeting
- Present the study process.
  - Present existing conditions.
  - Present potential bridge improvement concepts.
  - Gather public input.

**Project Purpose**

-  > Reconstruct bridge, which is currently in poor condition
-  > Elevate structure out from within the 100-year flood elevation
-  > Improve pedestrian connectivity to the Des Plaines River Trail

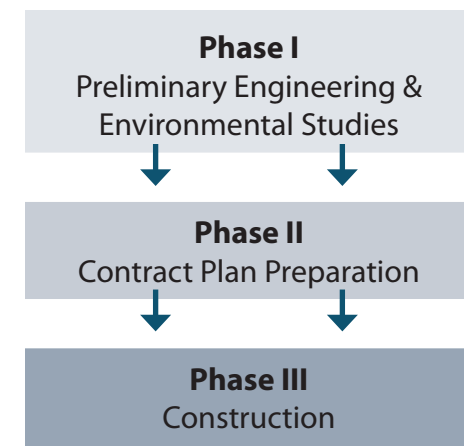

### Federal-aid Project Phases

Any transportation project involving the use of Federal funds must follow a project development process consisting of three phases.

Phase I includes extensive environmental and design studies and is described in the schedule on the back of this brochure. After a preliminary improvement plan is approved, Phase II Engineering (Contract Plans) and Right-of-Way Acquisition/Temporary Easement Coordination would begin. During this phase, detailed construction plans would be developed and any necessary land would be acquired for the project. Permanent right-of-way acquisition is not anticipated at this time, however this will be confirmed as the preliminary improvement plan is refined. Temporary easements for construction access and grading will be necessary and are currently being evaluated and will be presented at the next public meeting. Phase III is the physical construction of the project.

Federal funding will be used by the Village of Libertyville and the Libertyville Township Road District for the construction of the project.

# Alternatives Comparison

## Elevations

## Typical Sections

**Alternative 1:** IDOT Standard Concrete Bridge Parapet With Aluminum Railing

**Alternative 2:** IDOT Aesthetically Enhanced Concrete Bridge Railing

**Alternative 3:** Slotted Concrete Parapet Wall with Decorative Lighting

**Alternative 4 - BL:** IDOT Aesthetically Enhanced Concrete Bridge Railing With Decorative Lighting

**Alternative 4 - VG:** Concrete Bridge Parapet With Formliner Textured Surfaces And Decorative Railing And Lighting (Green)
